

INNOVATIVE SOLUTIONS

New!
***Laminated
Composite Tapes
from Strait-Flex®***

STRAIT-FLEX®

Our *NEW* line of paper-faced composite tapes offer ease of installation, perfect straight lines and unmatched bondability. Guaranteed: no cracks, no callbacks.

Flex-90^o

ITEM # F90-100

2" Wide 100 Ft. Length Roll

Ideal for inside and outside 90° corners, and intricate off angles. Inside angles of bay windows, coffered ceilings and off angles.

Ammo-Flex²⁰⁰

ITEM # AMF-200

2" Wide 100 & 200 Ft. Length Roll

Loads into any Bazooka[®] for fast applications of intricate off-angles or inside 90° corners.

Bazooka[®] is a Registered Trademark of the Ames Taping Tools Systems Company.

Mid-Flex³⁰⁰

ITEM # MF-100

3" Wide 100 Ft. Length Roll

Ideal for bay windows, vaulted ceilings, coffered ceilings, and off-angles. Use in place of corner bead.

Wide-Flex⁴⁰⁰

ITEM # WF-100

4" Wide 100 Ft. Length Roll

Ideal for hard-to-straighten vaults, butterfly vaults, hard-to-straighten outside corners, and obtuse angles.

Fast Straight Easy

Do the Job Right

To get the job done fast and done right, you'll find our new tapes all feature a memory-free hinge design that speeds application and provides straighter corners. And with our patented PUR-laminated nose, you avoid paper fuzz-up during finishing and sanding. Our diamond punched pattern allows for easier feathering, faster drying, the highest bonding strength. Available in widths of 2", 3" and 4", you'll find a Strait-Flex product suited for your specific application.

Features:

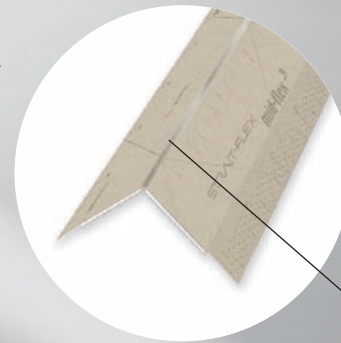

- Straightens framing irregularities.
- Memory-free hinge design allows for ease of installation, straighter corners and perfect angles.
- Diamond-punched pattern guarantees an even lay-down of the paper, providing maximum adhesion with no wrinkling or bubbling.
- PUR-laminated nose ensures perfect corners without fuzz-up during finishing and sanding.
- Second coat of compound can be applied immediately – very light skim coat to finish.
- Cuts easily with knife or scissors.
- No curl-up after folding product.
- No cracks. No callbacks.

Straight, Durable Corners

For the best corner in the industry, settle for nothing less than Strait-Flex. Known for providing tapers with perfectly straight corners, Strait-Flex makes even the apprentice taper perform like a pro. For tapers familiar with Strait-Flex's current product line, take the next step in the taping revolution. With over four years of research and development, Strait-Flex introduces Flex-90⁰, Ammo-Flex²⁰⁰, Mid-Flex³⁰⁰, and Wide-Flex⁴⁰⁰. These tapes provide all the benefits needed for fast and easy applications.

The patented process laminates our composite PVC with 94 lb. heavy-gauge paper, that outperforms all other flex tapes on the market.

With a PUR laminated nose, corners remain tough and rigid with the perfect angle every time. It also provides a tough corner that will not fuzz during finishing or sanding.

Diamond-punched paper edging allows for easier feathering, faster drying, and the highest bonding strength available which also leads to no edge cracks or costly callbacks. Combined with a memory free hinge, flex-tapes wipe down flat and easy.

PVC reinforcement provides the durability in a solid corner with the flexibility needed for a fast and easy application.

Faster Applications

In an industry where every second counts and time is money, Strait-Flex provides the solutions. Strait-Flex applies fast and easy by reducing drying time and the number of coats required to finish without sacrificing strength and durability. Save time and money with Strait-Flex.

Diamond-punched 94 lb. paper edge gives superior strength and bonding performance.

Strait-Flex's patented composite material

Memory-free hinge design allows for sharp inside or outside corners

STRAIT-FLEX®

As a carpenter and professional homebuilder for 25 years, Strait-Flex founder John S. Conboy knew the problems surrounding the drywall phase of the home building industry. He identified quality concerns regarding the taping of off-angles, inside corners, and bay windows which were so often compromised during this phase of construction. John set out to design a product that would ease installation, resolve the problems of edge cracking, and assist in maintaining straight alignments of intricate off angles.

In 1995, he obtained the patent for the development of Strait-Flex drywall tape and began manufacturing and distributing it in the St. Louis area. The product was introduced at national conventions where it was displayed and demonstrated to building professionals. The Strait-Flex product line has been well received by contractors for its high quality finish and its ease of use and is sold by construction material suppliers globally.

Strait-Flex's focus is to manufacture products that solve construction problems. We encourage contractors to contact us with any comments, needs, or problems. Custom items created upon request. For more information or free samples of Strait-Flex products, give us a call at 1-888-747-0220 or visit www.straitflex.com.
