sky-cradle

Keeping the Work at Railing Height

Strait-Flex *NEW Sky-Bucket* keeps Mud-Pro buckets or other five-gallon buckets at railing height and secures to aerial platforms.

Our *Sky-Cradle* keeps cornerbead, ceiling grids, and main-tees organized and ready-to-go, leaving the platform safely unobstructed.

arch-stick

Made of high-impact, composite material with a tempered wire backbone that eliminates “flat-spots”. Arch-Stick is designed for free-form curves, groin barrel ceilings, and straight-to-curve transitions.
