

Introducing two new products from Strait-Flex that will mesh with your next product order.

Add these items to your next Strait-Flex order and easily meet pre-paid freight minimums!

ultra-mesh

Fiberglass Drywall Mesh Tape

Features:

- Good alkaline resistance.
- Superior strength
- High tensile strength.
- Superior adhesion.
- 2" wide x 300 feet.
- Packaged 24 rolls per carton. Most mesh is 36/case making it easier to buy a full case!

Applications:

- Flat seams
- Wet areas
- Crack & hole repair
- Reinforces metal corner bead

drywall shims

Features:

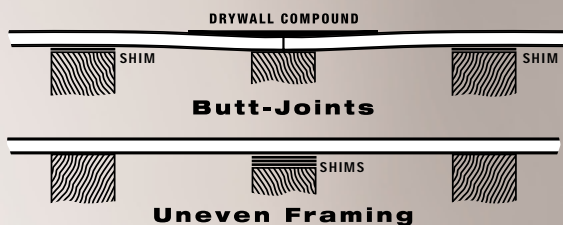

- 1 1/2" X 45", .060" thickness.
- Used to straighten rough framing.
- Easy to cut with utility knife.
- Saves on taping labor by shimming drywall to allow greater inset at joints

Applications:

- Floating butt-joints.
- Framing irregularities.

Unique packaging:

- No more shims damaged on the job site.
- Easy open end for convenient "pull-out-as-you need them" access.
- Prominent and easy to understand graphics makes a nice in-store retail package. Will become a "silent salesman" when displayed "on end" for easy viewing by contractors.

COMPOSITE DRYWALL TAPES

Original

Original straightens common framing irregularities. Ideal for use with bay windows, vaulted ceilings, coffered ceilings, and off angles.

Original with Holes

Same as Original except with holes that promote quick drying and easier detection of voids. Ideal for use with bay windows, vaulted ceilings, coffered ceilings, and off angles.

Medium

Slightly thinner than Original but still ten times stronger than paper tapes. Medium straightens small framing irregularities. Ideal for inside 90° corners and intricate off angles.

Medium with Holes

Same as Medium except with holes that promote quick drying and easier detection of voids. Ideal for inside 90° corners and intricate off angles.

Big

Big straightens large framing irregularities in vaulted ceilings, outside off angles, and can be used in place of metal corner bead.

Huge

Huge straightens very large framing irregularities and will span over very large gaps. Ideal for hard-to-straighten vaults, butterfly vaults, obtuse angles, and outside corners.

Arch-Flex

The first arch product that comes on a roll. Ideal for barrel curves, groin curved ceiling applications, free-form curves, and arched windows and doors.

Tuff-Tape

Four times stronger than paper tape. Tuff-Tape is used for flat seams and inside corners where strength and speed of finish is desired. Also, ideal for cement board applications in tub and shower areas.

L-Bead

L-Bead comes on a roll and performs like conventional L-Bead. This product requires a very light fill coat to finish. Produced for drywall thickness of 3/8", 1/2" and 5/8". Ideal for window returns, sky lights and wall edges.

NEW CONCEPT DRYWALL PRODUCTS

X-Crack

Eliminates ceiling cracks forever. X-Crack straightens uneven framing and keeps the drywall joint stationary while allowing structural movement of framing members.

Perma-Patch

Outperforms metal patches. Perma-Patch quickly repairs doorknob damage to drywall. Ideal for mis-cut or relocation of receptacles, ceiling and can lights. The most economical way to repair drywall.

Outlet-Patch

Pre-cut to fit standard receptacle boxes, Outlet-Patch repairs and reinforces mis-cuts or damaged areas around receptacle boxes. Very fast, extremely strong.

Head-Patch

Pre-cut to fit standard sprinkler head receptacles, Head-Patch will not sag on large ceiling mis-cuts. The fastest and most permanent repair.

Black Iron Patch

Pre-cut to fit standard sprinkler pipes, Black Iron Patch repairs and reinforces mis-cuts or damaged areas around sprinkler pipe holes. Fast and strong.

Big Arch Roller

Big Arch Roller is designed to speed application time of Arch-Flex and Big Stick products in 90° applications. This tool makes installation very fast and squares up corner beads on walls.

Flex-Folder

Always handy, Flex-Folder is used to speed the folding of all Strait-Flex tapes to correct installation angles.

Nose Pick

Always ready, Nose Pick attaches to the DeWALT model DW272 drill to remove missed screws very quickly and easily.

Rock-Clip

Rock-Clips assist in hanging drywall in vaulted ceilings and elevated areas. These clips become an extra pair of hands for the installer while reducing strain on shoulders and head. The fastest and safest way to hang drywall.
